

**REMARKS**

In an Office Action dated June 19, 2007, the Examiner entered an *Ex parte Quayle* action, closing prosecution on the merits and requesting clarification of a description in the specification. Applicants thank the Examiner for the thorough analysis and detailed discussion given to the present Application.

**Clarification of the Specification:**

The Examiner correctly noted that Figures 1(B) and 3 are consistent with the description of "claw member 7" being supported by "base member 5," as correctly described in the Specification at page 13, lines 15-18, and elsewhere. However, the Examiner noted an issue with the description of "claw member 7" in relation to "carriage 2," correctly noting that while "claw member 7" swings counter-clockwise to allow passage for "carriage," it is not clear to state: "In other words, the claw member 7 pivotably supported by the carriage 2 simply makes swinging motion . . ." See, Specification, page 18, lines 21-22.

After careful consideration of the Examiner's detailed analysis and comments, and in order to clarify the Specification and without adding new matter, the Applicants amended the questioned description as follows: "In other words, the claw member 7 ~~pivotably supported by the carriage 2~~ simply makes swinging motion . . ." Applicants believe that this amendment is consistent with the Examiner's comments, an accurate statement in relation to the invention as filed, and that it appropriately clarifies the Specification.

**Allowance of the Claims:**

The Office Action dated June 19, 2007, allowed Claims 1-6. Applicant desires that the Application including those claims issue as a patent, with the change to the Specification, as noted herein. Therefore, in view of the above amendment, Applicants believe the pending application is in condition for allowance.
